

Little Fin's Check Your Size

If you are unsure of which size to pick, this chart should act as a guideline. However, it is not fool-proof.

Print this sheet out and place on a solid, hard floor. Place a bare foot on the paper as close to the heel on the outline of the chart as possible. With any luck, it should provide a clearer indication of the size you need. If in doubt, head for a size up rather than down. Also, it is important to double-check that your printer hasn't scaled down the PDF. We have a scale below for you to check with a ruler.

The ages on the International Sizing Chart are just a rough guide.
